

BUOYANCIS: The Safety Net Protocol

Project Whitepaper

January 30, 2026

1 Executive Summary

Buoyancis is a decentralized framework designed to restore trust in high-stakes environments. By utilizing staked assets and verified milestones, we ensure total accountability.

2 Competitive Landscape

Traditional models lack the "Skin in the Game" required for modern transparency.

- **Venture Capital:** High fees, low transparency.
- **Buoyancis:** Staked accountability, real-time verification.

3 Financial Safeguards

The **Safety Net Protocol (SNP)** ensures capital protection.

Role	Min. Stake	Slashing Risk
Executive	20% Equity	High
Technical Lead	10% Tokens	Moderate
General Partner	5% Capital	Low

3.1 The Trust Equation

Our reliability factor (R) is defined as:

$$R = \frac{\sum(M_v \times S_t)}{C_a}$$
